Transaction Rationale

Strategic Benefits of the Proposed Transaction

Facilitate Growth Strategy Execution	• Increased balance sheet capacity to fund strategic investment opportunities – Minority investors buyouts – Privatization and consolidation
Cash Flow Optimization	• Overall net income increase given the reduction of financial expenses and tax optimization • Potential increase of dividend payout levels at Enel Brasil from the current 25%, supporting Enel Américas cash flow
Credit Enhancement	• Capital increase proceeds used to reduce indebtedness of Enel Brasil (from 3.0x to 1.3x)^(1,2) resulting in a reduction at Enel Américas (from 1.7x to 1.0x)^(1,2) on a consolidated basis – Balance sheet to be strongly positioned to capitalize on upcoming opportunities in the sector
Higher Market Capitalization, Float & Liquidity	• Equity offering expected to increase Enel Américas' free float^(2,3) by up to US\$ 1.7 Bn and market cap^(2,3) by up to ~30% – Higher float correlated with increased stock liquidity

Notes:

1. Net Debt / EBITDA as of 2019E,
2. Assuming a US\$ 3.5 Bn capital increase
3. As of Feb 6th, 2019

... Privatization and Consolidation Transactions in our Chosen Distribution Markets

	Enel Position	Key Market Opportunities
 Brazil	✓ #1 market position by number of customers ✓ High exposure to urban environments in the largest metropolitan areas in Latin America – São Paulo, Rio de Janeiro, Lima and Bogota	▪ Highly fragmented sector with ongoing consolidation ▪ Several distribution companies requiring operational and financial restructuring trading attractively ▪ Expected new regulatory framework to favor economies of scale
 Colombia	✓ High density grids supportive of digitalization rollout ✓ Enel X deployment catering to premium clients with high relative purchasing power	▪ Government announced intention to privatize selected regional distribution companies ▪ Financial sponsor-held assets could eventually trade
 Peru	✓ Proven operational turnaround track-record ✓ Ability to replicate Enel Dx Goiás and Enel Dx São Paulo playbook	▪ Substantial footprint of state-owned distribution companies – Government has previously shown a potential interest in launching a privatization process ▪ Potential strategic exiting the market

Transaction Structure

Enel Américas Proposed Capital Increase

Transaction Terms and Conditions

Offering Structure

- Registration of common shares in the Santiago Stock Exchange, Electronic Stock Exchange and CMF⁽¹⁾
- Concurrent SEC⁽²⁾ registration of ADSs for trading in NYSE

Pricing Mechanism

- Price setting mechanism: Rights Offer Price = 5 Day VWAP⁽³⁾ of Common Shares minus 5% discount

Capital Increase Size

- Up to US\$ 3,500 MM

Use of Proceeds

- Up to US\$ 2,650 MM⁽⁴⁾ for providing its subsidiary Enel Brasil S.A. with funds which will be transferred through a capital increase in Enel Brasil S.A. and/or a loan granted to the latter in order to permit Enel Brasil S.A. the payment of its own debts with Enel Finance International, which replaced the original debts of Enel Brasil S.A. with banks issued in the context of Enel Dx São Paulo acquisition
- Up to US\$ 850 MM⁽⁴⁾ for restructuring of pension funds and reduction of other contingencies in Brazil

Preemptive Rights Period (PRP)

- Mandatory 30-day PRP in Chile
- Remaining unsubscribed shares: additional voluntary PRP, followed by market offering (in case of remaining shares after the voluntary PRP)

Timing

- ESM on April 30th, 2019
- Launch of 1st PRP: Expected at the end of June 2019

Notes:

1. Comisión para el Mercado Financiero
2. Securities and Exchange Commission
3. Volume weighted average price
4. Debt with Enel Finance totals BRL 9,400 MM. Use of proceeds are BRL-denominated and the US\$ 2,650 MM assumes BRL/USD exchange rate of 3.71 (as of February 12th, 2019) and that repayment takes place after finishing the first round of preemptive rights, amount may increase if debt repayment occurs later

Transaction Structure

Preemptive Right Periods (PRP) in both Chile and the United States

1

Mandatory PRP

- Mandatory Preemptive Rights Period (PRP) to be held for **30 days** in Chile
 - Enel Américas extends the PRP to ADR holders as well
- All existing shareholders will have the preemptive right to subscribe a number of shares proportional to their ownership **5 business days prior to the launch of the PRP** ("Chile Record Date")
 - In the case of ADR holders, the record date is the business day prior to the launch of the PRP
- During the PRP, subscription rights will trade publicly in both Chile and the US
- Shareholders/ADS holders can:
 - Exercise their rights and subscribe for shares at the Rights Offering price;
 - Sell their rights; or
 - Take no action, which results in the shares being unsubscribed

2

Additional Voluntary PRP

- With the remaining shares after the Mandatory PRP, Enel Américas plans to hold one additional 24-day Voluntary PRP that will provide certain shareholders with another opportunity to participate in the capital increase
- Shareholders that exercised their rights during the Mandatory PRP will be eligible to participate in the Additional Voluntary PRP in proportion with shares subscribed in the Mandatory PRP
- The terms and conditions of the Additional Voluntary PRP will be the same as that of Mandatory PRP

3

Rump Auction

- Should there be unsubscribed shares after the two PRPs, Enel Américas may consider a market offering in order to place the remaining shares via a mechanism to be defined

Timing Considerations

Comprehensive Market Communication Process for ESM with AFPs and Other Local Investors, Global Accounts, and Ratings Agencies

Notes:

1. Timing is dependent on share registration with CMF

Price-Setting Mechanism

Fixed Price Set by Pre-Determined Formula

Description

- The price for the proposed Rights Offering will be determined by a price-setting formula calculated prior to the Mandatory PRP commencement
- The Board of Directors will propose a formula (detailed below) for approval by the ESM on April 30th
- This is in line with Chile and Latin America market precedents

Proposed Price-Setting Formula

- The proposed price-setting-formula is defined as the 5 day VWAP⁽¹⁾ of Enel Américas' common stock previous to the start of the PRP, minus a fixed discount of 5%

The formula is a transparent price setting mechanism:

Rights Offer Price = 5 Day VWAP⁽¹⁾ of Common Stock minus 5% discount

Notes:

1. Volume weighted average price

Closing Remarks

Closing Remarks

A

Enel Américas is the largest private utility company in South America and has delivered against its stated goals since the 2016 reorganization

B

Successful delivery since 2016 evidences Enel América's capacity for creating long term value through organic and in-organic means

C

Additionally, the proposed transaction unlocks the Company's ability to pursue upcoming value-creating minority investors buyout, privatization and consolidation opportunities as well as Enel X deployment consistent with its recent trajectory

D

The proposed transaction optimizes the company's cash flow, enhances its incremental leverage profile and reinforces its status as a preeminent investment vehicle
