

## PRESS RELEASE

### ENEL AMÉRICAS LEADS ADVANCE IN CORPORATE GOVERNANCE RANKING IN REPORTA CHILE 2019 REPORT

- Enel Américas was the company that achieved the greatest jump in score, compared to the 2018 report

**Santiago, August 30, 2019** - The Reporta Chile 2019 report, published by Spanish consultancy firm Deva – an international agency specializing in corporate reputation that evaluates companies listed on the IPSA exchange – recognized Enel Américas as the company that has achieved the largest advance in the index over the past year.

Created in 2010 to cover companies listed on the Madrid Exchange (IGBM), and replicated in Chile since 2016 with the companies that are included on the Santiago Exchange (IPSA), Reporta analyzes the quality of information that companies report to their shareholders and interest groups on financial, non-financial, environmental, social, and governance matters for each ordinary general shareholders' meeting. The ranking is calculated using an in-house methodology that assesses efforts to provide information over and above applicable reporting requirements.

The results of Reporta Chile 2019 underscore the commitment and dedication of Enel Américas to provide active and transparent information to its shareholders, in line with the values that inspire the company and the Enel Group.
